

Middle Coast Software Inc.

Secure, maintainable software for federal and commercial missions

UEI: ZL8PMD5A78S7 | **CAGE:** Available Upon Request | **Business Size:** Small Business | **Security:** CMMC 1

Value Proposition: Middle Coast Software helps organizations modernize critical systems without sacrificing security, maintainability, or operational continuity.

Company Overview

Middle Coast Software Inc. is a small business software engineering firm focused on secure, maintainable systems for mission-driven organizations. We support federal, contractor, and commercial teams that need practical modernization, reliable integrations, and clear technical execution across complex environments.

NAICS Codes

541511 Custom Computer Programming Services | 541512 Computer Systems Design Services | 541513 Computer Facilities Management Services | 541519 Other Computer Related Services | 518210 Data Processing, Hosting, and Related Services | 541330 Engineering Services | 611420 Computer Training | 541618 Other Management Consulting Services

Technology Stack

Polyglot delivery: Java, C#, Python, JavaScript/TypeScript, and SQL across web frameworks, databases, cloud services, APIs, CI/CD, and secure development tooling.

Industries & Mission Areas

Federal contractors, small and mid-sized organizations, regulated operations, workflow teams, data-driven operations, and modernization programs.

Primary Service Offerings

- Application modernization and sustainment
- Custom web, business, and workflow applications
- Systems integration, APIs, and data exchange
- Cloud migration support and platform modernization
- Automation, dashboards, reporting, and internal tools

Core Competencies

- Business-critical workflow development
- Legacy modernization, API integration, and cloud migration
- Secure software delivery with compliance-aware engineering
- Data pipelines, automation, dashboards, and reporting
- Architecture discovery and technical planning

Keywords

Modernization, custom applications, APIs, systems integration, cloud migration, automation, dashboards, secure delivery, CMMC, NIST 800-171, data pipelines, technical discovery.

Representative Experience

- Modernized legacy applications to improve reliability and maintainability
- Designed APIs and integrations across systems, databases, and platforms
- Built dashboards, reports, automation, and internal operational tools
- Supported secure delivery practices for compliance-aware environments

Contracting Readiness

- Available for prime, subcontract, and teaming opportunities
- Supports fixed-scope, time-and-materials, discovery, and modernization work
- Works with technical, operational, and compliance stakeholders

Compliance & Security Posture

- CMMC 1; practices aligned to NIST 800-171 expectations
- Secure SDLC habits: access control, code review, issue tracking, documentation
- Maintainability, traceability, and operational continuity focus

Differentiators

- Senior engineering execution with direct communication
- Security-first habits aligned to NIST 800-171 expectations
- Pragmatic delivery balancing speed, quality, and traceability
